

### PROFESSIONAL SUMMARY

Operator-technologist who makes complex work visible, connects technical and business teams, and builds operating mechanisms that turn data, automation, and emerging technology into adopted, measurable outcomes. Direct experience across operations, reporting, telemetry, workflow design, AI-assisted systems, quality, ERP/CRM, and cross-functional delivery.

### ROLE-ALIGNED CAPABILITIES

- ◆ Data product discovery
- ◆ Stakeholder problem framing
- ◆ Release readiness
- ◆ Data/AI workflow governance
- ◆ Business-value prioritization
- ◆ Delivery flow and unblock
- ◆ Adoption and outcome review
- ◆ Clear tradeoff communication

### PROFESSIONAL EXPERIENCE

#### Vape-Jet — Director of Operations

2025-Present

- Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry, and AI-assisted workflows.
- Connects factory, field, customer, and machine-fleet signals into prioritized work, earlier risk detection, cleaner handoffs, dashboards, standard work, training, and accountability.
- Works directly in a software-enabled robotics and machine-vision environment with approximately 1,000 fielded robots informing support and operating feedback loops.

#### DudeWorth — Founder / AI and Automation Advisor

2017-Present

- Develops AI-readiness and opportunity frameworks that assess value, feasibility, data readiness, governance, adoption burden, reuse, and time-to-value.
- Designs agentic workflow patterns using structured context, retrieval, AI agents, human judgment, escalation, decision records, evaluation, and governance rails.
- Advises on AI-enabled operations, logistics technology, warehouse automation, transportation systems, network analysis, and workflow design.

#### Amazon — Operations Management / Site Leader

2014-2018

- Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually.
- Built leadership routines, labor planning, throughput visibility, escalation paths, standard work, and operating mechanisms.
- Applied Lean and Gemba practices across safety, quality, throughput, customer experience, and team engagement.

### CANDIDATE THESIS

**Route data work to outcomes.** Make the decision behind each product explicit, then manage the path from problem to release to retained use.

### OUTCOME ROUTING

**Build** when outcome, evidence, delivery, and adoption ownership align.

**Validate** when value is plausible but a key assumption needs proof.

**Sequence** when dependencies or capacity require an explicit order.

**Stop** when the decision or value does not justify effort.

### MICROSOFT DATA PRODUCT FOCUS

Brings product leadership to Power BI and Microsoft Fabric environments: business-value prioritization, semantic-model alignment, data quality, access, release readiness, adoption, AI-assisted workflows, and outcome measurement.

### CREDENTIALS

Google AI Essentials  
IBM Enterprise Design Thinking  
Practitioner  
Six Sigma Certification  
OSHA 10

## ADDITIONAL EXPERIENCE

### Compunetics — Director of Operations and Engineering Management

2000-2013

- Progressed through R&D program management, production management, strategic acquisition, operations management, and director-level leadership.
- Led engineering, manufacturing, quality, customer delivery, and complex technical programs in advanced electronics and high-reliability environments.
- Built quality systems, standard work, root-cause practices, performance measures, and process controls.
- Collaborated with high-consequence customers and partners including DoD, CERN, Intel, and AMD; published industry articles and delivered technical talks.

### Cardinal Building Products — Regional Director

2021-2023

- Built the company's first remote regional operation.
- Modernized distributed customer, CRM, commercial, fulfillment, logistics, digital marketing, SEO, and online-buying workflows.
- Advanced AI-enhanced transportation-management and route-planning concepts.

### ZeusVu — Chief Pilot, Autonomous Systems and Aerial Data Operations

2018-2022

- Led regulated drone operations across medical, energy, logistics, real-estate, and restricted-airspace contexts with a 100% safety record and no FAA incidents.
- Developed TensorFlow-based concepts for automated aerial inventory and computer-vision-enabled field intelligence.
- Designed medical drone delivery and chain-of-custody concepts connecting technology, risk, stakeholders, and governed execution.

### Enviro Social Capital — Chairman of the Board

2014-2017

- Co-founded and led a public-private impact initiative focused on sustainable infrastructure, green finance, and civic transformation.
- Helped shape and evaluate a \$200 million Social Impact Bond feasibility concept for Pittsburgh sewage and green-infrastructure improvement.

## EDUCATION

### University of Pittsburgh

Bachelor of Science

Academic grounding includes materials science, physical chemistry, and biology-related studies.

[Google Scholar profile](#)

## TECHNICAL TOOLKIT

Agentic AI · LLM workflows · RAG patterns · Human-in-the-loop design · Python · SQL · JavaScript · TensorFlow · Tableau · ERP/Odoo workflows · Jira · Confluence · HubSpot · Slack · GIS and mapping workflows

## OPERATING METHODS

Lean · Gemba · Six Sigma · Standard work · Root cause · Decision records · Product intake · Prioritization · Release readiness · Adoption review · Escalation design

## ARMADA VALUE

Combines product judgment, delivery mechanisms, cross-functional translation, adoption discipline, and measurable operations.

Positions Power BI, Fabric, automation, and AI as parts of an operating system for better decisions - not as standalone outputs.
